

Alvin Radeka Pratama

Jakarta, Indonesia (UTC+7) alvin@alvinradeka.com linkedin.com/in/alvinradeka github.com/alvinradeka

Available worldwide for remote contract & fractional engagements — flexible across time zones.

SUMMARY

Senior Go, platform & infrastructure engineer and engineering manager with eight years across payments, e-commerce, health, and logistics — building backend systems and the teams behind them. Equally comfortable as a hands-on IC, an architecture/migration lead, or a fractional engineering manager.

SELECTED OUTCOMES

- AnekaPay — led a Node.js + MongoDB → Go + MySQL migration, consolidating 14 services into 6 (-57%) and roughly halving infrastructure cost; owned the business-continuity and disaster-recovery plan.
- Tokopedia — lifted payment success by 30% and test coverage to 85%; drove Monitoring-as-Code and canary deployments across engineering tribes.
- DELOS — scaled engineering from 3 to 25, built a metrics-driven performance-review framework, and led ISO 27001 gap remediation across every department.
- Shipper — led a 12-engineer cross-border team building a Honeywell-integrated Warehouse Management System for a ~300-warehouse network (40–60k orders/day).
- Halodoc — shipped FitScore and an extended multi-doctor chat platform (5,000+ patients) as EM, at 100% SLA compliance.

CORE STACK

Go · Kubernetes · Docker · Kafka · gRPC · GraphQL · AWS · GCP · PostgreSQL · MySQL · MongoDB · Redis · Grafana · Prometheus · Loki · Tempo · Mimir

EXPERIENCE

Engineering Manager — Halodoc	2025
Technical Advisor — AnekaPay	2024–25
Engineering Manager — DELOS	2022–24
Software Engineer Lead — Shipper	2020–22
Senior Software Engineer — Tokopedia	2018–20
Software Engineer — Astragraphia IT	2017–18

EDUCATION

B.Eng, Universitas Gadjah Mada — 2011–2016
